## Hazardous Equipment Affidavit

Pertaining to all purchases of potentially dangerous components

### PLEASE READ CAREFULLY

The following must be completed, signed and dated for purchase of any transformer over 30 milliampere short circuit current or energy storage capacitor over 50 joules

**May be faxed to 1 603 672 5406 or E Mailed to <[sales@amazing1.com](mailto:sales@amazing1.com)>**

#### TRANSFORMERS

High voltage transformers that can supply currents in excess of 30 milliampere are considered potentially lethal. *When transformers are used for neon signs, a ground fault interrupter (GFI) shuts down any ground current over 5 milliamperes.* Many high voltage transformers used in research are ground referenced creating an extreme shock hazard and do not have this safety feature.

#### CAPACITORS

Capacitors with voltage ratings over 450 volts and energy storage over 50 joules are potentially lethal. Capacitors can hold these lethal charges indefinitely and must be discharged with a suitable probe before contacting.

These components are intended for experienced personal in handling and working with high voltages.

*Insert part numbers and values*

I \_\_\_\_\_ employed by \_\_\_\_\_

and am fully aware that the *electrical components* as sold will require proper housings, safety interlocks, fusing, labelling, qualified operating experience and safety compliances for their intended use. I fully understand all hazards and liabilities with the product in question. I will not hold **Information Unlimited** responsible in any way for injuries/or damages resulting from proper or improper use of these components, parts or finished products.

SIGNED \_\_\_\_\_

DATED \_\_\_\_\_

\*DRIVERS LICENSE OR OTHER IDENTIFICATION or \_\_\_\_\_

**\*Drivers license/ID are not required for purchases to known companies.**
